

CONNECT

by FAUDI Aviation

CONNECT by FAUDI Aviation, the business platform that combines smart applications with data management, analytics, service integration and extensibility.

Optimize cross-line processes and boost business productivity with FAUDI Aviation web/mobile apps:

Voucher App

Nameplate App

Recertification App

Corrected dP App

Boost productivity

Use the platform as a collaborative workspace to share, store, and retrieve data. Users can accelerate business processes by linking data, and optimise payment via vouchers.

Simplified access

Users get access to all the services that meet their needs as part of their platform journey. Leverage business applications and innovative technologies to gain comprehensive insights into operations.

Power applications

Order new nameplates, manage AFGUARD® sensor recertification, calculate corrected differential pressure, and easily pay for digital services with vouchers.

Always accessible

Access all FAUDI Aviation services anytime, anywhere. Services are available as mobile and web applications.

Better together

Work together to meet challenges effectively. The business platform enables users to optimise processes and create value from data.

Make informed business decisions

CONNECT by FAUDI Aviation provides up-to-date intelligent operational data at your fingertip so you can be confident in making decisions that will minimize disruption in your operations. Simple, fast and effective.

Voucher App

Use vouchers to purchase digital services and products. With the pooling feature, individual pools can be formed with colleagues, customers or partners to allocate or receive vouchers.

Nameplate App

Create and order nameplates for all types of filter vessels online. Guaranteed to be the fastest and most cost effective solution in the industry.

Recertification App

With the Recertification App, the AFGUARD® recertification process can be digitally planned and managed in just three steps. The app automatically reports AFGUARD® status, upcoming recertifications and provides all important files such as shipping documents and certificates.

Corrected dP App

Calculate and monitor corrected differential pressures for all filter types with the FAUDI Aviation dP App. Forecast filter element performance using trend monitoring.

CONNECT

by FAUDI Aviation

The business platform for optimising your processes to become more agile in a hybrid working world.
